2018 Financial Expectations (in millions)

Cardlytics anticipates revenue and non-GAAP adjusted EBITDA to be in the following ranges:

	<u>Q1 2018</u>	<u>Full year 2018</u>
Revenue	\$29.5 - 30.0	\$157 -160
Non-GAAP adjusted EBITDA**	\$(4.9) - (4.7)	\$(12.6) - (11.4)
Estimated weighted average shares	17.5	19.8

** With respect to our expectations above under the caption “2018 Financial Expectations,” a reconciliation of adjusted EBITDA to net loss on a forward looking basis is not available without unreasonable efforts due to the high variability, complexity and low visibility with respect to the items excluded from this non-GAAP measure. We have provided a reconciliation of historical non-GAAP financial measures to the most comparable GAAP measures in the financial statement tables included in this press release. Adjusted EBITDA as presented above excludes the impact of any charges related to FI Share commitments as well as non-cash charges related to the issuance of equity instruments to our FI partners, which we expect to total \$2.5 million in the first quarter of 2018, and otherwise reflects the definition of adjusted EBITDA as set forth under the caption “Use of Non-GAAP Financial Measures.”

Cautionary Language Concerning Forward-Looking Statements:

This press release contains "forward-looking statements" within the meaning of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, including but not limited to our financial guidance for the first quarter of 2018 and full year 2018. These forward-looking statements are made as of the date they were first issued and were based on current expectations, estimates, forecasts and projections as well as the beliefs and assumptions of management. Words such as "expect," "anticipate," "should," "believe," "hope," "target," "project," "goals," "estimate," "potential," "predict," "may," "will," "might," "could," "intend," variations of these terms or the negative of these terms and similar expressions are intended to identify these forward-looking statements. Forward-looking statements are subject to a number of risks and uncertainties, many of which involve factors or circumstances that are beyond our control. Our actual results could differ materially from those stated or implied in forward-looking statements due to a number of factors, including but not limited to: our financial performance, including our revenues, margins, costs, expenditures, growth rates and operating expenses, and our ability to sustain revenue growth, generate positive cash flow and become profitable; risks related to our substantial dependence on its Cardlytics Direct product; risks related to our substantial dependence on Bank of America, N.A. and a limited number of other financial institution partners; the amount and timing of budgets by advertisers, which are affected by budget cycles, economic conditions and other factors; our ability to generate sufficient revenue to offset contractual commitments to FIs; our ability to attract new FI partners and maintain relationships with bank processors and digital banking providers; our ability to maintain relationships with marketers; our ability to adapt to changing market conditions, including our ability to adapt to changes in consumer habits, negotiate fee arrangements with new and existing financial institutions and retailers, and develop and launch new services and features; our significant amount of debt, which may affect our ability to operate the business and secure additional financing in the future, and other risks detailed in the "Risk Factors" section of our prospectus filed pursuant to Rule 424(b)(4) under the Securities Act of 1933 on February 9, 2018 and in subsequent periodic reports that we file with the Securities and Exchange Commission. Past performance is not necessarily indicative of future results. The forward-looking statements included in this press release represent our views as of the date of this press release. We anticipate that subsequent events and developments will cause our views to change. We undertake no intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law. These forward-looking statements should not be relied upon as representing our views as of any date subsequent to the date of this press release.

Use of Non-GAAP Financial Measures

To supplement the financial measures presented in our press release and related conference call or webcast in accordance with generally accepted accounting principles in the United States ("GAAP"), we also present the following non-GAAP measures of financial performance: adjusted contribution, adjusted EBITDA, non-GAAP net loss and non-GAAP loss per share.

A “non-GAAP financial measure” refers to a numerical measure of our historical or future financial performance or financial position that is included in (or excluded from) the most directly comparable measure calculated and presented in accordance with GAAP in our financial statements. We provide certain non-GAAP measures as additional information relating to our operating results as a complement to results provided in accordance with GAAP. The non-GAAP financial information presented herein should be considered in conjunction with, and not as a substitute for or superior to, the financial information presented in accordance with GAAP and should not be considered a measure of liquidity. There are significant limitations associated with the use of non-GAAP financial measures. Further, these measures may differ from the non-GAAP information, even where similarly titled, used by other companies and therefore should not be used to compare our performance to that of other companies.

We have presented adjusted contribution, adjusted EBITDA, non-GAAP net loss and non-GAAP net loss per share as non-GAAP financial measures in this press release. We define adjusted contribution as our revenue less our FI Share and other third-party costs. We define adjusted EBITDA as our net loss before income tax benefit; interest expense, net; depreciation and amortization; stock-based compensation expense; change in fair value of warrant liability; change in fair value of convertible promissory notes; foreign currency (gain) loss; loss on extinguishment of debt; costs associated with financing events; restructuring costs; amortization and impairment of deferred FI implementation costs; and termination of U.K. agreement expense. We define non-GAAP net loss as our net loss before stock-based compensation expense; change in fair value of warrant liability; change in fair value of convertible promissory notes; foreign currency (gain) loss; loss on extinguishment of debt; costs associated with financing events; restructuring costs; and termination of U.K. agreement expense. We define non-GAAP net loss per share as non-GAAP net loss divided by non-GAAP weighted-average common shares outstanding, basic and diluted, which includes our GAAP weighted-average common shares outstanding, basic and diluted, and our weighted-average preferred shares outstanding, assuming conversion.

We believe the use of non-GAAP financial measures, as a supplement to GAAP measures, is useful to investors in that they eliminate items that are either not part of our core operations or do not require a cash outlay, such as stock-based compensation. Management uses these non-GAAP financial measures when evaluating operating performance and for internal planning and forecasting purposes. We believe that these non-GAAP financial measures help indicate underlying trends in the business, are important in comparing current results with prior period results, and are useful to investors and financial analysts in assessing operating performance.

* We define FI monthly active users (“FI MAUs”), as unique customers of our financial institution (“FI”) partners that logged in and visited the online or mobile banking applications of, or opened an email from, our FI partners during a monthly period. We then calculate a monthly average of FI MAUs for the periods presented above. We define average revenue per user (“ARPU”), as the total GAAP Cardlytics Direct revenue generated in the applicable period, divided by the average number of FI MAUs in the applicable period.
